The Northern, Western and Southern Regions also supplied seasonal surplus power to the extent of 328.1 MU, 1666.7 MU and 518.1 MU respectively to other regions during 1999-2000.

Expansion of Power Transmission

†4059. SHRI RAJ MOHINDER SINGH :
SHRI KAPIL SIBAL :

Will the Minister of POWER be pleased to state :

(a) whether it is a fact that power shortage can be met by improvement and expansion in the power transmission in the country;

(b) whether Government have conducted any study in the matter and prepared a report in this regard;

(c) if so, the comprehensive details thereof; and

(d) if the report has since not been prepared, the reasons for the same?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (SHRIMATI JAYAWANTI MEHTA) : (a) Yes, Sir. By improving the Transmission and Distribution (T&D) system in the country, the shortages of electricity can be reduced both due to reduction in T&D losses as well as by transferring the surplus power available in the States/Regions to the deficit states/ regions.

(b) to (d) A Perspective Transmission Plan for the time frame 2011-2012 has been prepared by the Central Electricity Authority (CEA) in June, 1999. The objective of the Perspective Plan is formation of a National Grid in a phased manner. This will facilitate the transfer of power across the regions. The transmission system identified covers the network required for evacuation of power from major generation projects and for inter regional transfer.

Production vis-a-vis charging cost by electricity

†4060. SHRI BALWANT SINGH RAMOOWALIA :
DR. D. MASTHAN :

Will the Minister of POWER be pleased to state :

†Original notice of the question was received in Hindi.
